

SEND IF FORWARD PROJECT

One morning, I was alone in bed, at about 3:30 am, I woke up thinking about all the people who may not have heard or don't believe what is going to happen in the tribulation. I grieved to think about what they would go through. Then my phone on the end table by my bed lit up, I was not even holding it, that was strange. It came up with a sermon on the tribulation. I said, Ok Lord, I will work on it. This experience resulted in this package. I would put in a gallon zip lock bag, all the information God had told us would happen. I would leave in my home, one packet on the end table, in my garage, in my car, and on the screened porch. On the cover it says, if you find this package it is for you open it.

God was going to take the believers out of the physical world before this difficult time. Creator God also told us what those left behind would experience, and how to deal with it. The peace and hope that can come from knowing and believing God's plan.

I realized that by preparing the package and sharing it with those living today will encourage them to make sure they have learned what God told us. That will enable them to take to those critical steps for peace and joy today. You need to hear from God here.

Just think of the incentive for everyone working on the package distribution to understand what God has told us and be informed about the decisions everyone needs to make.

If I am gone and they find this package the creditability of the message will be extremely high,

See **Send it forward package.**
